Tape and Reel Specifications

Description
Surface-mounted devices are packaged in embossed tape and wound onto reels for shipment in compliance with Electronics Industries Association Standard EIA-481 Rev. A.

Specifications

Cover Tape
• The cover tape may not extend past the edge of the carrier tapes
• The cover tape shall not cover any part of any sprocket hole.
• The seal of the cover tape to the carrier tape is uniform, with the seal extending over 100% of the length of each pocket, on each side.
• The force to peel back the cover tape from the carrier tape shall be: 20 gms minimal, 70 gms nominal, 100 gms maximal, at a pull-back speed of 300 ± 10 mm/min.

Loading the Reel
Empty pockets are not permitted between the first and last filled pockets on the tape.
The surface-mount devices are placed in the carrier tape with the leads down, as shown in Figure 1.

Leaders and Trailers
The carrier tape and the cover tape may not be spliced. Both tapes must be one single uninterrupted piece from end to end.
Both ends of the tape must have empty pockets meeting the following minimum requirements:
• Trailer end (inside hub of reel) is 300 mm minimum
• Leader end (outside of reel) is 500 mm min., 560 mm max.
• Unfilled leader and trailer pockets are sealed
• Leaders and trailers are taped to tape and hub respectively using masking tape

SOJ Devices

PLCC and LCC Devices
**Packaging**

- Full reels contain a standard number of units (refer to Table 1). Each reel has a 3" hub unless otherwise noted in table.
- Reels may contain up to 4 mark lots. However, in case low yield is encountered an additional lot may be added.
- Each reel is packed in an anti-static bag and then in its own individual box.
- Labels are placed on each reel as shown in Figure 2. The information on the label consists of a minimum of the following information, which complies with EIA556, “Shipping and Receiving Transaction Bar Code Label Standard”:
  - **Barcoded Information:**
    - Customer PO number
    - Quantity
    - Date code
  - **Human Readable Only:**
    - Package count (number of reels per order)
    - Description
    - “Cypress-San Jose”
    - Cypress p/n
    - Cypress CS number (if applicable)
    - Customer p/n
- Each box will contain an identical label plus an ESD warning label.

**Ordering Information**

CY7Cxxx-yyzzz

- **xxx** = part type
- **yy** = speed
- **zzz** = package, temperature, and options

- **SCT** = soic, commercial temperature range
- **SIT** = soic, industrial temperature range
- **SCR** = soic, commercial temperature plus burn-in
- **SIR** = soic, industrial temperature plus burn-in
- **VCT** = soj, commercial temperature range
- **VIT** = soj, industrial temperature range
- **VCR** = soj, commercial temperature plus burn-in
- **VIR** = soj, industrial temperature plus burn-in
- **JCT** = plcc, commercial temperature range
- **JIT** = plcc, industrial temperature range
- **JCR** = plcc, commercial temperature plus burn-in
- **JIR** = plcc, industrial temperature plus burn-in

**Notes:**

1. The T or R suffix will not be marked on the device. Units will be marked the same as parts in a tube.
2. Order releases must be in full-reel multiples as listed in Table 1.
